

ADARSH KUMAR OJHA

Computer Science & Engineering | Full-Stack Web Developer

Kolkata, India | +91-7255870959 | ojhaadarsh424@gmail.com
GitHub | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Third-year Computer Science and Engineering student at Netaji Subhash Engineering College with hands-on experience in full-stack web development. Skilled in React.js, Tailwind CSS, JavaScript, Node.js, Express.js, MongoDB, Git, and GitHub. Experienced in developing responsive, database-driven applications and implementing authentication, payment workflows, and modern user interfaces. Strong foundation in AI/ML and problem solving, with 150+ LeetCode problems solved. Seeking a Web Development Internship to contribute to real-world software products.

EDUCATION

Netaji Subhash Engineering College, Kolkata <i>B.Tech in Computer Science & Engineering</i>	3rd Year Expected Graduation: 2028
J.P. College, Ara, Bihar <i>Class 12 – PCM</i>	72.4%
M.D. Carmel School, Jagdishpur, Bihar <i>Class 10</i>	72.4%

TECHNICAL SKILLS

Languages: C, C++, Python, Java (Basics), JavaScript
Frontend: HTML, CSS, JavaScript, React.js, Tailwind CSS
Backend: Node.js, Express.js
Database: MongoDB
Tools: Git, GitHub
Core: REST APIs, Authentication, Database Integration, Responsive Web Design, Data Structures & Algorithms, Problem Solving

PROJECTS

Know Your Leader	<i>React.js Tailwind CSS Node.js MongoDB</i>
- Developed a web platform providing structured profiles of political leaders, including educational background, political career, work performed while in power, and reported criminal cases. - Built a responsive frontend using React.js and Tailwind CSS with a modern, user-friendly interface. - Developed backend functionality using Node.js and integrated MongoDB for data storage and retrieval. - Designed structured profile-based navigation to make complex public information easier to explore.	
NSEC Library Website	<i>React.js Tailwind CSS Node.js Express.js MongoDB</i>
- Redesigned the college library website with a modern and responsive user interface, replacing the outdated user experience. - Addressed major limitations of the previous system by introducing an online payment workflow and improving authentication. - Integrated frontend, backend, and database components into a unified web application. - Focused on improving usability and the overall digital experience for students.	
Campus Cafe	<i>Web Development</i>
- Built a realistic mock food-ordering web application inspired by modern food-delivery platforms. - Designed interactive interfaces for browsing food items and simulating the complete online ordering experience. - Implemented common food-ordering workflows with emphasis on responsive UI and user experience.	
Astra AI – Astronaut Safety & Hazard Detection System	<i>Web Interface AI/ML Integration</i>
- Contributed to an offline/local-first astronaut safety and hazard detection prototype developed for Smart India Hackathon 2026. - Built interface components for displaying detected events, confidence levels, risk levels, timestamps, and visual evidence. - Designed web-side workflows for presenting AI-generated safety events and emergency information.	

ACHIEVEMENTS & ACTIVITIES

- Smart India Hackathon (SIH) 2026 Participant** – Contributed to Astra AI, an astronaut safety and hazard detection prototype.
- SAP Idea Ignition Participant** – Contributed primarily to the frontend development of the project.
- Solved **150+ problems on LeetCode**. Earned multiple **DSA Specialist badges on Naukri.com**.
